**Streamline Direct**

*Streamline Direct lighting distribution in wall configurations for mainly exterior area light applications that require full cutoff optics.*

The Streamline direct optical system provides a full cutoff classification in the 0° horizontal head position. The head position is adjustable upward and downward by 15° each way to facilitate other distributions depending on application requirements. The midi scale is designed for wet location use and feature a sealed optical chamber.

The wall mounted units mount directly to the building surface over a recessed octagonal j-box or horizontally mounted switch box in the case of the mini units (by others). Extended 'U' shaped and 'Z' shaped arm castings provide a unique design element to the Streamline wall mounted units.

Rebelle's full range of eight polyester powder coat finishes are available. RAL and custom color match finishes are also offered.

Design of the Streamline Direct fixtures coordinate seamlessly with the Indirect and Architectural Sconce Streamlines.

Detailed information on specific Streamline Direct luminaires can be found on our website.
