

CYL-003 Photometric File Information

When configuring photometric files for CYL-003 products with multiple LED modules use the instructions below:

For 7010 and 7010LR* – CYL-003 Wall Mount Up/Down Light

Choose files with the appropriate optic and orientation, up file should be stacked above down file with the two files spaced 7.6" apart.

i.e. 7010-12L40-SP-UP.ies can be combined with 7010-12L40-WFL-DN.ies to create a single up/down luminaire with a spot optic up and a wide flood optic down, catalog number ordered would be 7010-2x12L-120-40-SP-WFL-Finish

For 7100 and 7100LR* – CYL-003 Wall Mount Up/Down Light

Choose files with the appropriate optic and orientation, up file should be stacked above down file with the two files spaced 14.1" apart.

i.e. 7100-12L40-SP-UP.ies can be combined with 7100-12L40-WFL-DN.ies to create a single up/down luminaire with a spot optic up and a wide flood optic down, catalog number ordered would be 7100-2x12L-120-40-SP-WFL-Finish

*For the **7010LR** and the **7100LR** the light emitted from the light reveal is not considered in the photometric files as it is not a significant source of light.
